Blood Donor Clinic
To Be Held Sept. 6
C. N. P. Hospital

The next blood donors clinic will be held on Tuesday, September 6 at the hospital. There will be an afternoon and evening clinic. At the clinic held April 13, 346 pints of blood were donated with the town of Blairmore topping the list with 124 pints; Coleman, 98; Bellevue, 71; Hillcrest, 31; Frank, 17; Sentinel, 2; Burmis, 2, and Lundbreck 1.

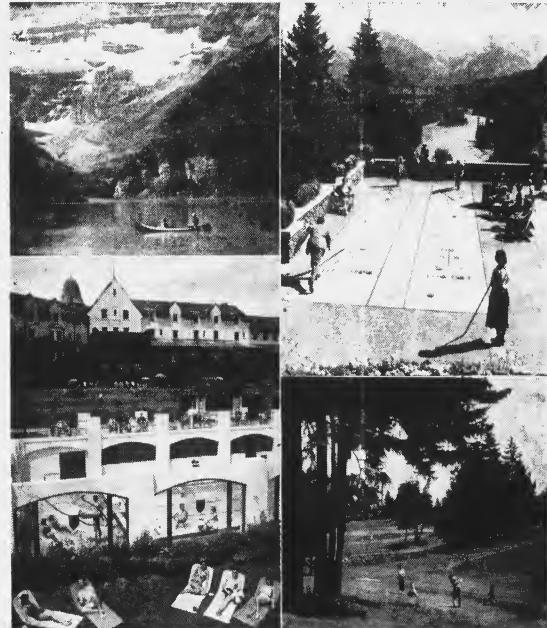

At the April clinic many gave blood for the first time and following is a list of donors who gave five pints or more including the April clinic. There may be some names not on this list if they missed the last clinic.

Top honours from Coleman goes to Mrs. Mary Kosma who has given a record number of donations from this town—18 pints in all. Indeed a fine record. Mrs. Kosma is to be congratulated for this fine service.

Following is the list of those giving five pints or more:

Mrs. J. Allen, Jr.
Mr. G. Atkinson.
Mr. E. Clarke.
Mr. and Mrs. H. Coop, Sentinel.
Mrs. P. DeCicco.
Mr. M. Drew.
Melvin Dunford.
Bruno Gentile.
Mrs. F. Guerard.
Mr. J. R. Hill.
Bill Holyk.
George Jenkins.
J. R. Jones.
Mr. and Mrs. J. R. Kwasiak.
William R. Liddell.
Mrs. W. Lansbury.
John A. McDonald.
Mrs. W. McLeod.
Mr. and Mrs. A. McQuarrie.
George Omelusik.
Mr. D. Pow.
Mrs. M. Roughhead.
Walter Smolik.
Mrs. P. Topak.
Mrs. L. Vasek.
Obert Watt.
Mrs. J. Wavreican.
Mr. and Mrs. H. Zak, Jr.

The Pythian Sisters of Coleman will be canvassing the homes for blood donors for the September 6 clinic.

HOLIDAYS BECKON: From coast to coast across the country sunny skies and balmy summer days will soon be calling Canadians away from the hurry and scurry of workaday life so that relaxing annual break known as the "summer holidays". Soon to open are the Canadian Pacific Railway's hotels, inns, chateaux and lodges located at famed resort centers throughout Canada. Golf, swimming, riding, sun bathing, tennis — all the summer holiday pastimes — including the serenity of just enjoying magnificent scenery — await the vacationers. Upper left photo shows a couple canoeing on beautiful Lake Louise in the Canadian Rockies, where the Canadian Pacific's famous Chateau is open from June 14 to Sept. 17. Lower left shows guests at the Digby Pines Hotel at Digby, N.S., open this season from June 22 to Sept. 4, enjoying themselves taking the sun or lazing about the swimming pool. Shuffleboard enthusiasts at the Banff Springs Hotel always have a hard time keeping their minds on the game with such beautiful sights as the Bow River and the Rocky Mountains to distract their attention. This magnificent summer resort will be open from May 31 to Sept. 15. Golfing on the 18-hole St. Andrews-by-the-Sea course, site of the Algonquin Hotel, open from June 15 to Sept. 7, provides thrills to experts and duffers alike, as the course if of championship calibre but test for average players too.

Coleman Streets Receiving New Look

Town work crews have in the last two weeks been busy repairing streets that have been badly in need of repair.

Main street from the post office east has had a new surface laid and 2nd street in west Coleman, has received a light surfacing. Both of these streets had become badly broken up with the heavy traffic.

It is hoped that other streets in town will receive attention in the near future.

Willow Drive Assn. Hold Annual Picnic Crows Nest Lake

Under clear skies with a bright sun shining down, residents of the Willow Drive community held their annual picnic on Sunday, August 7 at that wonderful mountain lake known as Crows Nest Lake. Boating and horse-shoes were the main events enjoyed by both sexes. It seems that the ladies had that game of horse-shoes down to a science.

We wonder where those ladies developed their pitching arms, but now we know why their husbands always answer with a "Yes, Dea" with top honors going to Mrs. Grace Juhlin and Mrs. Helen Juhlin.

I suggest that you husbands had better mend your ways and don't forget that "Yes, Dear".

We wonder why Walter didn't do so good on his unpainted surf board. His excuse was that the speed of the towing boat was not fast enough, but we think that the water was too cold to chance a dunking in.

Well, that's all right, Walter. We will accept your explanation this time.

A grand time was had by all, but we do wish that more of you members would attend these picnics as the more there are the better time that can be had by all.

So next time come along and bring some friends, even if they are ladies with good pitching arms.

Blairmore Forest Fire Now Under Control

BLAIRMORE — A forest fire which raged out of control for nearly 12 hours on the wooded slopes of Goat Mountain here was being held in check Saturday morning by weary fire fighters.

The flames broke out late Friday afternoon at the Blairmore cemetery on the north side of the town and within a few hours were racing up the slopes of the mountain.

At about 1 a.m. the fire was brought under control and the most dangerous part of the blaze was isolated. Late Saturday morning the mountainside was still smouldering and a dense cloud of smoke hung over the town.

Officials did not think there was much chance of the fire breaking out again and spreading over the summit of the small mountain, but fire-fighters crews were being kept on the job until remaining pockets of flames were completely extinguished.

Town employees burning brush near the cemetery were believed to have sparked off the fire.

Flames first spread to the grassy area around the base of the mountain and then began their 1,000 foot climb.

Alert Residents

Although there was little chance of the fire endangering any inhabited areas, nearby residents were alerted for possible evacuation.

Debris underbrush on the mountain helped to quickly spread the fire and sent a dense cloud of smoke into the air. Quick bursts of flame intermittently punctured the smoke as the fire reached small stands of evergreens.

Debris underbrush on the mountain helped to quickly spread the fire and sent a dense cloud of smoke into the air. Quick bursts of flame intermittently punctured the smoke as the fire reached small stands of evergreens.

Working on the outskirts of the blaze, fire fighters managed to keep flames away from heavily wooded portions of the mountain.

The steep rocky slopes of Goat Mountain hindered the efforts to control the blaze. A Caterpillar tractor rushed to the scene was unable to do much work except on the lower slopes and a fire engine had to use two relay pumps to get a limited supply of water at this time.

up to fire-fighters.

Shortly after the fire started, RCMP officers scoured Blairmore, Bellevue, Hillcrest, and surrounding areas to find available men to battle the flames.

By Saturday morning only about 30 men remained on the job, although it was expected the crew would be doubled later in the day.

Gordon Lind, chief forest ranger in the area, said a special four-man fire fighting crew from the nearby Bow Forest Reserve had been brought in to battle the flames.

A Caterpillar tractor had managed to climb to the first ridge of the mountain and was clearing a fire guard there. Two way radio contact was being kept between the tractor and crews at the base of the mountain.

A misty rainfall for two hours early Saturday helped keep the flames in check and by late morning only a few spot fires were still burning in out-of-area.

The latest reports on the forest fire on Goat Mountain in Blairmore is that it is under control, but still requires approximately 150 men to guard against a further outbreak. The terrain makes it very difficult to completely extinguish due to the extreme dry undergrowth and pine needles which will smolder for days. The West Canadian Mine has been idle for two days so as the men may help in controlling the fire. Men are being recruited from all of the Pass towns to assist the Forestry Board. The fire has extended to the east side of the mountain but if wind does not come too strong to fan it, it is hoped to have it extinguished in a few days. Rain would be of the greatest help at this time as the forests are tinder dry. All persons are asked to be very careful with fires at this time.

St. Paul's United Church Hold Vacation School

The Vacation Bible School held in the United Church came to a close with a program and display Friday, August 5th. Many parents and friends were present to see the work of the children.

Bobby Liddel was master of ceremonies for the afternoon, assisted by Paul Clary, who gave the announcements.

Rev. R. McAulay presented diplomas to the children at the close of the program.

Two of the teachers, Margaret McDonald and Gayle Fontana rendered two lovely duets which were much appreciated by the audience. Mrs. G. Horn was in charge of the kindergarten class; Cynthia Bond and Rosalee Lowe had the junior group; Jean Coover and Gayle Fontana guided the girls in the 9 to 12 year group while Margaret McDonald and Beverley Bond had the boys class 9 to 12 years.

The program for each day consisted of worship, recreation outdoors, refreshments and handicrafts. Mrs. C. Coover was convenor of refreshments. Others helping with the school were Mrs. M. Dunford, Mrs. R. B. Lowe, Mrs. C. MacQuarrie, Mrs. A. Hallstrom, Carrie Horn, Mrs. A. MacQuarrie and Mrs. W. Liddell.

Handicrafts enjoyed by the classes were basket weaving, glittercraft, chemical embroidery, vase making, spaghetti motto and bracelets, pasting and coloring. There was an average attendance of 65 at the classes.

Old Timers Picnic

The report of the Southern Alberta Oldtimers Picnic held at Crows Nest Lake last Sunday will be printed in next weeks issue, as it was too late for this issue.

Coleman School Board Offers Discount On School Books

At a recent meeting of Coleman School Board the cash statement was read and accepted, with all accounts authorized for payment.

With regards to the purchase of school text books for the forthcoming term, the board decided to again purchase them and resell to the student at an eight per cent discount instead of the five per cent allowed last year. The board hopes that all students will take advantage of this offer.

The matter of having the house in the school yard painted — two tenders were submitted, with one priced at \$45 and the other submitted by J. Jenkins and P. DeCecio, school janitors, for \$200. The board awarded the contract to the \$200 tender.

The new school term will begin under way on Tuesday, September 6. Miss L. Johnston applied for a one year leave of absence, which was granted.

Coleman Woman Honored At Going-away Party

A lovely party was held at the home of Mrs. Emery Smith, of Blairmore, on Tuesday, August 9 to honor Mrs. Evelyn Bell of Coleman.

Eight ladies were present as Mrs. Elsie Emmerson presented Mrs. Bell with a beautiful picture of Lundbreck Falls.

Mr. and Mrs. Ding Bell have been residents of Coleman for a number of years, and are now making their home in Calgary, where Mr. Bell is employed.

Mrs. Bell, the former Evelyn Kaye of Bellevue, and two children, Fran and Tommy, will leave this week end to join Mr. Bell.

Mrs. Bell, while here, was an active member of the LDS Church holding the office of first counselor and secretary of the Primary Association.

Induction Service August 5

A large group of United Church people gathered to welcome Rev. Roderick McAulay and Mrs. McAulay to the Coleman - Hillcrest pastorate and to witness an impressive induction service on Friday, August 5 at 7:30 p.m.

Rev. Bert Mariani of Pincher Creek, gave the address to the minister and conducted the induction.

Mr. Frank Holberton of Lethbridge, gave the address to the congregation.

Present for the occasion were Mr. and Mrs. Taylor of the Fishburn district, who are Mr. and Mrs. McAulay's parents.

A corsage of rosebuds, a gift of the women of the congregations, was worn by the new minister's wife. A social hour followed in the club room where lunch was served.

Old Time Resident Passes Away

Mr. N. il McKinnon, one of Coleman's old time residents, passed away in the C.N.P. Hospital after a lengthy illness on Wednesday morning at approximately 12:30 a.m. As yet no funeral arrangements have been made. Further details will be published in next weeks issue of the Coleman Journal.

Restaurants that show evidence of lack of proper sanitation and neglect of general cleanliness should be reported to the local health department. Disease germs may be passed from person to person if tableware and silver is not properly sterilized.

Before using water from natural sources such as streams or lakes, it should be tested for safety. The use of one of the water purifiers recommended by a doctor, druggist or local health department is advisable. Boiling the water will also render it safe for drinking.

Human being not necessarily dead when taken from water

It has been noted as curious that in some cases where victims have been under water for only a short time, death has often occurred in spite of artificial respiration, while in the case of other victims under the water for a longer time, life has been restored. It has also been noted by many physicians that in many drowning cases post mortem examination has failed to discover water in the victim's lungs.

In a series of investigations carried on in 1938 by the late Sir Frederick Banting and associates, in co-operation with the Health League of Canada, the reason for these anomalies was found. In a large proportion of cases of apparent drowning the actual cause of death is not drowning, but suffocation or spasms of the heart or air from entering the lungs, and the result, although there is no water in the lungs, is death, just the same.

The closure of the larynx is in the first place protective. The aperture of the larynx closes when one takes a drink of water, or tea—to prevent the fluid going down the wrong way—into the lungs instead of into the stomach. In drowning cases, the closing of the larynx has the same objective. But as the victim becomes unconscious, the larynx often fails to open again as it does after you

have swallowed your drink of water or tea.

An essential in the revival of apparently drowned persons is to make sure that the air passages are free. The rhythmic application of artificial respiration should result in the audible passage of air in and out—listen for it. A doctor, of course, can make sure with his stethoscope.

Delay can fatal

Even a few minutes delay in applying artificial respiration may make all the difference between success and failure—life and death.

The air passages must be clear. There must be no let-up in the continuous, rhythmic application of pressure and release (say 15 times to the minute).

In suitable cases artificial respiration should be kept up for hours, until success is achieved, or rigor mortis sets in.

A human being is not necessarily dead because he has been under water for a few minutes. Even if in the water for half an hour or longer, life may still be present. While there's life, there's hope.

To further interest in prevention of death by drowning, readers are asked to send any true experiences they may have had, either as a participant or a bystander, in any drowning cases, to the Health League of Canada, 111 Avenue Road, Toronto.

Child recovers after half hour's immersion

Many people believe that artificial respiration is useless if the victim has been under water for more than a few minutes. This true story from the Health League of Canada will prove that this is not so. On July 7, 1937, a little girl fell off a raft in Carlton Lake, a deep water hole. She dove 17 times before the little body was recovered. She must have been under water for a good 20 minutes.

Two electrical workers trained in artificial respiration happened to be present, and artificial respiration was started at once. The little girl breathed in 35 minutes, and ultimately recovered.

This could have been a tragedy. It was prevented by the true experiences of the two electrical workers who knew how to apply artificial respiration, and had enough sense to keep it up. Tragedies through drowning can be prevented in many cases. Artificial respiration should be applied at once, and kept up continuously until either success is achieved, or rigor mortis sets in.

BE STRONG!

We are not here to play, to dream or drift; We have hard work to do and loads to lift; Shun not the struggle—face it; 'tis God's gift. Be strong! Say not, "The days are evil—Who's to blame?" And fold the hands and acquiesce—oh shame! Stand up, speak out, and bravely, in God's name. Be strong! It matters not how deep entrenched the wrong. How hard the battle goes, the day how long; Faint not—fight on! Tomorrow comes the song. —M. D. Babcock

Peanut Butter Pinwheel Loaf

Mix and sift into a bowl, 3 c. once-sifted pastry flour (or 2 1/2 c. once-sifted all-purpose flour), 5 1/2 lbs. Magic Baking Powder, 1/4 tsp. salt. Cut in finely 7 lbs. chilled butter, 1/2 c. sugar and 1/2 c. tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork. Knead for 10 seconds on lightly-floured board and roll out to 13" thick rectangle, 8 1/2" along one side. Cream together 1 lb. butter or margarine, 1/2 c. peanut butter and 1/2 c. lightly-packed brown sugar; sprinkle on rolled-out dough. Beginning at an 8 1/2" edge, roll dough up like a jelly roll and place in a greased loaf pan (4 1/2" x 8 1/2" x 2 1/2"). Bake in a hot oven, 400°, about 45 minutes. Serve hot, cut in thick slices, or cold, cut in thin slices, lightly spread with butter or margarine.

Always Dependable

Annual weed damage said \$255 million

Weeds cause an estimated annual loss to western Canadian farmers of \$255 million, according to H. E. Wood, Weed Commissioner with the Manitoba Department of Agriculture.

In a paper read before the Agricultural Pesticides Technical Society at Edmonton, Mr. Wood said that this figure is an average cost per hectare of \$1,028 a year. The figure is based on a hole, meanwhile, an approximately one-third of a billion dollars yearly.

These tremendous losses, said Mr. Wood, include additional tillage costs, competition of weeds to the growing crop and lower carrying capacity of pastures. Dockage in grain is also high, the job costing at each end for which tracing outlines and color chart are given on the pattern. A feature of this design is that the top may be raised and lowered by the user to fit the height of the child. This feature is provided for birds out of the sand box and stray dogs out of the pool on hot afternoons when junior is taking his nap. Everything is complete. Pattern 306, price 35¢. This pattern 306 is included with the Outdoor Play Equipment packet of five standard size patterns at \$1.50 postpaid.

Either solid stock or marine plywood may be used for the bottom and sides of this combination sand box and wading pool. Youngsters are taught to use the job site at each end for which tracing outlines and color chart are given on the pattern. A feature of this design is that the top may be raised and lowered by the user to fit the height of the child. This feature is provided for birds out of the sand box and stray dogs out of the pool on hot afternoons when junior is taking his nap. Everything is complete. Pattern 306, price 35¢. This pattern 306 is included with the Outdoor Play Equipment packet of five standard size patterns at \$1.50 postpaid.

In spite of the seriousness of the situation, "let us be encouraged by the fact that, with the tremendous advances in cultural, chemical and other weed control methods, weeds, in the main, are controllable," Mr. Wood concluded.

How to be a good sport

Pointers on being a good sport, whether you are in your teens, 20's, or much farther along: "Sport" good manners.

1. Always play your best. No matter how far behind you are, never stop trying.

2. Be a generous opponent (slow down advantage of a technicality in your favor, quick to give another the benefit of the doubt).

3. Treat your opponent respectfully.

4. Accept victory with modesty.

5. Never delay the game.

6. Never display "righteous impatience" by whistling, tapping or moving about.

7. If you break a rule, accept any correction immediately and gracefully with an apology.

8. Be quick to call any infringement of the rules on yourself, especially one not noticed by your opponent.

9. Never criticize a partner.

10. Remember that the most likeable person is the one who adapts quickly and easily to the "house" rules. (This is especially pertinent right now—in summer—when you may be a guest in a far-off place.)

Wild horses were very common in Europe during the Old Stone Age and formed an important part of the diet of the people.

The United States and Canada consume the extract from more than 40,000,000 pounds of dried horseradish root each year.

Increasing wool returns

Increasing costs of sheep operations have made it imperative that sheepmen improve their efficiency of production if they are to obtain a reasonable return for their efforts. Emphasis, according to S. B. Sten, Lethbridge Experimental Station, Canada Department of Agriculture, must be placed on improving the quantity and quality of wool and lamb produced per ewe. Because of competition from synthetic fibers, wool quality is especially important that the quality of wool should be improved.

During the past few years in Western Canada approximately 70 percent of the receipts from sheep have been from lambs and 30 percent from wool. In Eastern Canada the percentage contributed by lambs has been even higher. As a result more attention has been given to the production of lamb than for increased wool production. However, to obtain maximum returns from wool, emphasis also must be placed on this product.

The marketability of wool may be improved in two ways: (1) by improvement in the quantity, quality, and uniformity of wool produced from the individual sheep, and (2) by the proper preparation of wool for market after shearing. Both of these factors are important from the Lethbridge Station have shown that raw fleece weight is a good index of clean wool production. It measures the combined effects of fiber fineness, staple length, and density of fibers on a given skin area. As a result, satisfactory improvement can be made on this basis. The most accurate cutting can be done by timing by actual weighing the raw fleece and marking the low-producing sheep. However, this is not practical during shearing, so the best method is to handle all ewes in the field. Those with short-stapled, off-white, or poor quality fleeces should be culled.

To insure that the wool is properly prepared in order to command top prices, the following suggestions are important. The wool in the holding pens should be kept clean and free from dirt, debris, and foreign material. The wool should be sorted on a light-colored board, and the dark-colored wool should be sorted on a dark-colored board. The wool should be kept clean during the shearing. Wet tags should be removed before tying the fleece as they cause damage to the surrounding wool and consequently reduce fleece value. Stray, burly, and chatty fleeces are degraded. If the affected parts are removed by the producer, only the good parts will be graded. If the fleece in such a manner that when it is raised from the shears to neck and shoulder, it is compact and attractive package to the buyer. The rolled fleece then should be tied with a paper twine prepared especially for the purpose, never with binder twine. Finally, any black sheep should be shorn after the main band and these fleeces should be packed separately.

The provision of holding pens with slatted floors may not be practical for the smaller domestic flocks. Nevertheless, all these other precautions can be observed by any flock owner.

The week in Britain

Diabetes congress

Four representatives from Canada—among them Dr. Charles Best—are expected to attend the International Diabetes Congress to be held at Cambridge from July 4 to July 8. They are Professor R. E. Haist of the University of Toronto, Mrs. G. E. Muttart of Edmonton, and Dr. E. Gray, a Canadian living in Hong Kong. This Congress is the first of its kind ever to be held in the United Kingdom.

In Scotland

Four young farmers from Ontario, two men and two women, officially received at the Royal Highland and Agricultural Show in Edinburgh recently, by the Under Secretary of State for Scotland, Mr. Neil MacPherson. The visitors from Canada left Scotland for a visit to England on June 28.

1515 Scholarship

A Canadian has been awarded a scholarship for Physical Chemistry at Oxford, it was announced in London recently by the Royal Commission for the Exhibition of 1851. He is Mr. G. A. Freeman of Saskatchewan, one of several from the Commonwealth who will be able to study in the U.K. during the forthcoming academic year under the scheme. Other recipients of awards are from Australia, New Zealand, India, South Africa and Northern Ireland.

Air cadet exchange

Twenty-five British air cadets are expected to arrive in Canada next month under the Anglo-Canadian Exchange Scheme. The cadets will spend three months in Canada visiting Montreal, Quebec, Toronto and Ottawa. They will also see Niagara Falls and Algonquin Park and camp out with Canadian air cadets.

Saint Marino, the enclave entirely surrounded by Italy, is a mere 23 square miles, but is Europe's oldest state, having been founded in the fourth century by St. Marinus as a haven from religious persecution.

There are at least two eclipses of the sun every year. These occur when the shadow of the moon falls on the earth. The phenomenon may occur five times in a single year.

All living things have natural enemies

OTTAWA. — All living things have natural enemies that prey upon them. This forms the basis of what is often referred to as biological control of plant and animal pests. This principle is well expressed in the rhyme attributed to Dean Swift.

Big bugs have little bugs upon their backs to bite them, And little ones have lesser ones and so ad infinitum.

Biologists concerned with the control of parasites are naturally always conscious of the fact that there are parasites of parasites.

Dr. T. Johnson, plant pathology laboratory, Winnipeg, reports an example of biological control studies carried on by the Canadian Department of Agriculture is the attempt to control the European pine sawfly by the use of a virus disease.

Recently the most spectacular recent example of biological control is Australia's rabbit eradication campaign. This step was necessary to protect and maintain forage grasses for sheep production.

Scientists working with the rusts of cereal plants have known for years that these rusts have a natural enemy in the form of a fungus called Darluce filum. Its use for the control of rust has been investigated but results have not been too promising. This fungus spreads very slowly except under conditions of high humidity.

Recently a bacterial organism has been reported that has been found capable of attacking rust during spells of wet weather. This organism might be of some use in combating rust is now being explored in Canada and the United States. Under moist greenhouse conditions it will attack the rust within the plant and prevent the production of rust reproductive bodies. How effectively the bacteria will work under field conditions remains to be determined.

Saint Marino, the enclave entirely surrounded by Italy, is a mere 23 square miles, but is Europe's oldest state, having been founded in the fourth century by St. Marinus as a haven from religious persecution.

There are at least two eclipses of the sun every year. These occur when the shadow of the moon falls on the earth. The phenomenon may occur five times in a single year.

Yummy! Chelsea Bun Loaf

A treat you can make easily with new Active DRY Yeast

CHELSEA BUN LOAF

Now you have Fleischmann's Active Dry Yeast, forget about the old time hazards of yeast baking! Always at hand—always full-strength and fast rising! Keep a month's supply in your cupboard! Make this delicious Chelsea Bun Loaf—cut in slices for buttering, or separate the buns.

Scald 3/4 c. milk, 1/4 c. granulated sugar, 1/2 tsp. salt and 1/4 c. shortening; cool to lukewarm. Meanwhile measure into a large bowl 1/2 c. lukewarm water, 1 c. granulated sugar, stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Active Dry Yeast. Let stand 10 mins. THEN stir well. Add cooled milk mixture and stir in well-beaten eggs. Stir in 2 c. once-sifted flour and 1/2 c. confectioners' sugar. Knead on lightly-floured board. Add 1/2 c. butter or margarine and blend in 1/2 c. brown sugar (lighter than granulated sugar). Add 1/2 c. corn syrup; spread about 1/2 c. of this mixture in bottom of a large Loaf pan. Let stand until risen. Turn out and spread with pecan halves. Punch down and roll out to 1/2" thickness. Sprinkle with remaining sugar mixture and with 1/2 c. confectioners' sugar. Cut into 6 slices. Place in prepared pan. Cover and let rise until double in bulk, about 1 1/2 hours. Preheat oven to 400°. Bake 20-25 mins. Let stand in pan for 5 mins. before turning out.

Antibiotics investigations into stem rust control

Diligent and never ending research to control the ravages of stem rust of wheat by the use of antibiotics appears possible. Reports from the Botany and Plant Pathology Laboratory, Science Service, Canada department of Agriculture in Ottawa indicate that this is not regarded by the scientist as having any commercial application at present.

Out of several antibiotics tested under greenhouse conditions, Actidione showed promise so was selected for field trials. This antibiotic appears to have possibilities under both conditions; however all concentrations were purely experimental, and the quantity and strength of the spray applied may have been considerably more than was necessary.

Yields of sprayed plots were consistently greater than those of unsprayed plots. Germination tests of seed from plants sprayed with Actidione showed over 90 percent sprouting in all cases.

Vitamin C in Potatoes—Variation in the vitamin C content in different varieties of potatoes was found by the By-products Laboratory on the Canada department of Agriculture Experimental Station at Kentville, N.S. The varieties Memphine and Canso were found to have 13.2 and 11.6 mgs. respectively of vitamin C per 100 grams of fresh weight. This was nearly twice the amount found in Green Mountain, Irish Cobbler and Epicure varieties, which had 6.9, 6.3 mgs. respectively.

Many Chromosomes—"Heirloom" a gladiolus variety resulting from a cross between the varieties "Astrid" and "Elizabeth the Queen" has 62 chromosomes, which is twice the normal 31. The preceding word Chromosome counts made by the Horticulture Division, Department of Agriculture, Ottawa, on root tips of each of the above varieties have shown that in both Astrid and Elizabeth the Queen the normal number of chromosomes is 60, whereas 62 chromosomes were found in Heirloom. This condition explains the failure of Heirloom in crossbreeding.

WEEKLY BIBLE COMMENT

LOVE IS THE HEART OF TRUE RELIGION

The believer in every creed, to say nothing of those who belong to great historic churches or large denominations, might say, each in his own way, "My religion is the true one."

At the center of all religion, if I have any right to say, are faith and service. But faith and service are not enough.

The persecutor and the intolerant have faith. They evidently believe in what they profess, and they are sincerely intense in their advocacy of it.

But truth has to do with knowledge, and knowledge of understanding, and understanding depends upon love.

So, it is in accordance with reality that the New Testament makes love the center and soul of true religion, and by that very fact sets up a profound contrast with the lovelessness of some professions.

The Prophet Micah gave his famous command of true religion: "He (the Lord) hath shewed thee, O man, what is good, and what doth the Lord require of thee, but to do justly, to love mercy, and to walk humbly with thy God."

And it is John who brought it out into all its fullness and inclusiveness when he said: "He that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?"

In these words is expressed the truth of true religion.

ALLERGIC TO WHAT?

People who are sensitive to some particular substance may spend a long time suffering inconvenience or actual pain until they are able to identify the offending agent. Since the substance may be inhaled, eaten or absorbed through contact, and may affect the respiratory or digestive systems or the skin, it is advisable to have medical attention as soon as possible, in order to find out what is causing the allergy and to have proper treatment.

Marketing service changes announced

Homer J. Maybee, who has been acting chief of the livestock and poultry projects division, and is the successor of S. C. Barry as Director of Production Service, has been made chief of the livestock division. Mr. Maybee has been with the Marketing Service since 1922, and for several years was in charge of meat and grading services.

William Elgin Senn, who recently moved to Ottawa from Toronto, where he was district supervisor of livestock marketing services, has succeeded Mr. Maybee as chief of the livestock grading service. Mr. Senn joined the Marketing Service in 1934.

A. Drew Davy, formerly chief of poultry grading and inspection, has been appointed chief of the new poultry division. Mr. Davy came to the Canada Department of Agriculture in 1943 from Saskatchewan, where he was provincial poultry commissioner. Earlier he spent some time as operator of a chick hatchery and in the poultry produce business.

A. F. Curran, who has been district poultry inspector for Ontario, in Toronto, for the past few years, succeeds Mr. Davy as chief of grading and inspection. Mr. Curran has been with the Department since 1915.

Prior to his appointment as Director of Production Service, Mr. Barry was Chief of the combined Livestock and Poultry Division. The appointment of Mr. Maybee and Mr. Davy as Chiefs of the Livestock and Poultry Divisions respectively re-establishes these two sections as separate operating divisions as they previously were.

Weekly Tip

PREVENT RUST

If the mattress springs are rubbed occasionally with a cloth that has been dipped in melted paraffin, it will prevent rust.

APPETIZING RECIPES ::

Rich Golden Coins, with a buttery flavor, make tempting tea-time fare. Decorate them with red or green cherry slices

GOLDEN COINS

1 cup butter
1 cup icing or brown sugar
2½ cups flour
1 teaspoon almond flavouring
½ teaspoon salt

Cream butter thoroughly, add sugar gradually, blending well between additions. Add flavouring.

Sift flour, measure; add salt, and sift once more. Stir into butter mixture. Mix well, using electric beater or light beating motion with spoon.

Press mixture into long, smooth rolls, about two inches in diameter. Wrap each in wax paper and chill in refrigerator overnight or several hours, until stiff.

Cut in thin slices, place slices slightly apart on ungreased cookie sheet.

Bake in moderately hot oven, 350 to 400 degrees F., 8-10 minutes until golden brown. These cookies are dainty if decorated with red or green cherry slices. Makes about 5 dozen cookies.

WELL BALANCED DIET BEST FOR HEALTH

The reducing program that brought a fat person down to a weight of his former self may not be suitable for the fat man's friend. While the doctor may have prescribed exercise and certain drugs for the first individual's physical condition, the second person may find the same program harmful if he experiments himself, without competent advice. One safe plan that any one can try in order to get rid of superfluous fat is to cut down on too rich desserts, pastries and second helpings at the table.

Canada's Food Rules offer a well balanced diet without the extra fillers that usually add extra pounds.

FAST WORKERS

Food particles remaining in the mouth after eating may start to form destructive acids in a matter of minutes. Therefore, to protect the teeth, it is necessary to brush them immediately after eating. If this is inconvenient, rinsing the mouth with water. Eating an apple will also remove those small particles from between the teeth.

Proper hitting for more power

One of the most common faults and one which causes poor hitting with little power is shifting the body weight too late. Thus, the batter is not getting the most out of his hits. In other words, what might have been a Homer or hit for extra bases turns into a fly-out or a single.

The above is the secret of hard and long hitting.

Calcium vitally important to athletes

Every day more and more studies are proving the tremendous importance of calcium in the diet.

In applying this to athletic nutrition needs, it is readily seen that foods and beverages containing calcium and the other food elements needed to properly utilize calcium should be given a high priority.

The best source of calcium is milk and products made from milk—such as cheese, ice cream, cottage cheese, milk powders, etc.

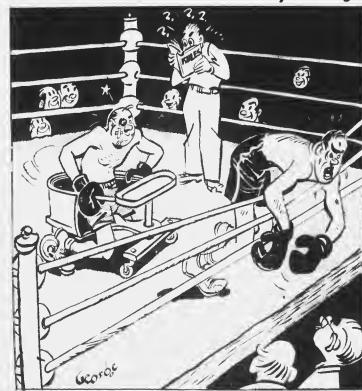

FIRST RECOGNITION

Pennill first was recognized and named by Alexander Fleming, an Englishman. He called it penicillin after the name given tufts of mold on the ground. The tufts of mold at the knee. The toes of your rear

fungus.

Ticklers

—By George

Ten-Word INTELLIGRAM

Check the correct answer:

1. Auto road races have been (temporarily) (permanently) banned in France following the Le Mans tragedy.
2. Disaster recently struck a (Russian) (British) submarine.
3. (Detroit) (Rome) will be site of the 1960 summer Olympic Games.
4. Strife between religion and the state is raging in (Brazil) (Argentina).
5. It (has) (has not) led to formal excommunication of the chief of state.
6. Big Four will meet in (July) (August).
7. Site of the conference will be (Geneva) (Lausanne), Switzerland.
8. (Krishna Menon) (Nehru) is India's roving ambassador.
9. You (can) (cannot) ski in continental United States in July.
10. The (Soo) (Panama) lock system celebrates its 100th anniversary this year.

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior, and 90-100, very superior.

On The Side : By E. V. Durling

Although George Bernard Shaw was considered somewhat contemptible by many people, in reality he was a very modest man. Shaw was born in Dublin, Ireland. When it was decided to place a tablet on the Shawan birthplace, many inscriptions embodying words of high praise were suggested. Finally when Shaw was asked what he would like to have written on the tablet, he suggested the words which can be seen on the side of the house on 33 Synge Street, Dublin, Ireland, where he was born in 1856.

Husband hunting in Alaska

Alaska is a happy husband hunting ground for smart bachelorettes. In southern section of the country the men outnumber the women four to one. In the northern part it is 12 to one. If a girl can't get a husband in Alaska it is possible she will never get a husband at all for there are 25,000 reported bachelors in Fairbanks, alone. Single men, eager to acquire a spouse are also reported plentiful in Anchorage. The married women who have knowledge of stenography and typewriting have a definite advantage because she can get a well-paying position and take her time in looking over the eligible bachelor situation.

How to lose friends in a hurry!

The sixth wedding anniversary is the "iron wedding". Which means you might give the husband a few golf clubs. But how about his loving wife? I suggest the sixth wedding anniversary be made the "mink wedding". Then all the friends of the young matron could join in contributing to buy her a mink coat.

"Well dressed" for the occasion

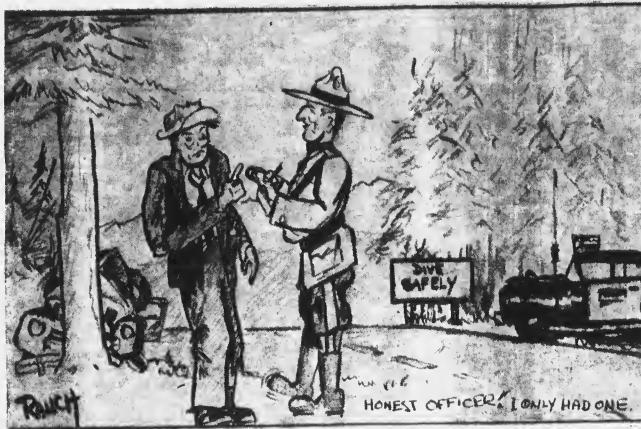

How much attire does the well-dressed cinema star require? One does not look upon Debbie Reynolds as a "clothes horse" type, still for her recent trip to England Debbie had a wardrobe consisting of 124 pairs of shoes, 24 evening gowns, 15 suits, 30 skirts, 45 blouses and a vast amount of lingerie. Also a platinum mink coat and a beaver coat.

Long and short of it

"Criticism of long hair styles by those women featuring the closely clipped fashion is caty and ridiculous," writes a Baltimorean.

"Long hair is woman's crowning glory. Those who have long hair wear it in the wavy and then with a simple pony tail when it is short. A woman with long hair makes a woman look more like a woman and less like a man, adds to her charm, seductiveness and desirability.

That closely clipped short hair—decreases a woman's sex appeal about 99 percent."

Three Coleman Boys To Vernon Cadet Camp

VERNON, B.C. — Three Coleman boys are among more than 600 B.C. and Alberta cadets now in camp in this Okanagan Valley centre taking seven weeks training.

Representing more than 80 cadet corps in the two provinces, the teen-aged youngsters travelled here by road, rail and air from home towns located from Vancouver Island to the Saskatchewan border.

Courses during the seven-week program are split into two main categories. These are the Senior Leader's Wing, training more than 400 boys as instructors in infantry subjects for their own corps; and the "D&M" Wing, training 200 youngsters in driving and maintenance of three-ton Army trucks. Other boys are training as rifle coaches.

Training is undertaken by Regular Army, Militia and Cadet Services of Canada officers and N.C.O.'s assigned to cadet training for the summer.

Following are names of local boys at camp: Cadet Sgt. T. W. Knight, Cadet Cpl. T. J. Iwasaki, and Cadet E. J. Zakk.

VERNON, B.C. — It's a never-ending battle, but Royal Canadian Army Service Corps men and civilian cooks are managing to keep abreast with requirements of more than 600 teen-age appetites at the big Army Cadet camp here.

Cadets will eat vast quantities of food during the seven-week camp including: 45,000 quarts of milk; 29,000 pounds of bread; 45,000 pounds of meat including 22,000 weiners for hot dogs; 8,000 pounds of butter and more than 120,000 eggs; more than 100,000 pounds of vegetables; 1,000 pounds of jam; 1,300 pounds of peanut butter; 800 pounds of oatmeal; and 800 pounds of cocoa.

Their diet is specially designed for growing youngsters. For instance they get 40 ounces of fresh milk daily instead of the 25 ounces supplied to soldiers, but they drink less tea and coffee.

In charge of messing and catering for the camp is Capt. K. J. McLean, Vancouver, who reported an average increase in weight of four pounds at last year's camp. He said he hoped this figure could be boosted this year.

Capt. McLean, assisted by WO 2 John Martin, Vancouver, also

administers spending of the daily 8 cents "extra messing" allowance which is used to purchase items not covered by the regular ration scale. Throughout the summer this will include enough ice cream to provide three servings a week; fresh corn; cantaloupes; strawberries and chicken.

Service Corps personnel are also responsible for the procurement of the supplies. Vernon supply depot is under command of Lieut. G. W. Reilly, Vancouver. As many items as possible, including all dairy supplies, are bought locally.

Extension For Upland Game Birds

EDMONTON (CP) — An extension of the duck hunting and upland bird season and increased choice for big game hunters feature changes in 1955 Alberta game regulations made public recently by the department of lands and forests.

The new regulations allow the hunters to go after all upland birds, except blue grouse and ptarmigan, from Oct. 15 to Nov. 30. Previously the season dates ran from one half hour before sunrise on Oct. 18 to one half hour after sunset Nov. 20.

A new possession limit has also been set — 20 birds of each species. In other years the limit was five birds.

In the big game section, the big limit has been increased to include a choice of either deer, moose or elk.

Deer can be shot in November and December throughout the province except east and south of highways No. 2 and 12. Previously the regulations read shooting could take place in the area lying north of the Crows Nest — Medicine Hat branch of the Canadian Pacific Railway and west of No. 2 highway.

The area for taking female elk has been extended north as far as the height of land south of the Highwood river. The season runs through November and December.

Changing wet bathing clothes to dry ones will help to avert chills and a summer cold. It is also a good idea to avoid people who cough and sneeze without covering nose and mouth with a dispositive tissue.

Coleman Man Fined, Driver's Licence Suspended for Driving While Impaired

BLAIRMORE — In magistrate's court here this week Walter Cichy was found guilty of a reduced charge of driving while impaired and fined \$100 and costs. His drivers licence was also cancelled for a six-month period.

The RCMP charge arose out of a motor accident on No. 3 highway between Blairmore and Coleman late July 30 between a car driven by Cichy and a second car driven by Berwyn Pison, Lundbreck.

The accident resulted in damage amounting to \$500 in the Cichy car and about \$400 to the second vehicle.

Pison told Magistrate F. S. Radford he had been heading west toward Coleman when the other car appeared to come directly at him. He stated he swerved to the right but was unable to avoid the collision. The witness added that after the accident he spoke to the accused and he appeared to have been drinking.

Followed Accused

James Cox, Sentinel, testified he had followed the accused from Coleman to the scene of the accident and said Cichy had frequently swerved from over the centre line of the road.

Members of the RCMP detachment in Blairmore, Const. R. H. Pincock, Const. E. A. Bruch and Const. W. Becker said the accused had been unable to give a coherent statement concerning the accident when taken to the detachment shortly after the mishap. Const. Bruch and Const. Becker both stated the man's breath had an odor of alcohol.

Cichy, who was defended by counsel, stated he had nothing to drink since about 6 p.m. on the day of the accident and had left home to come to Blairmore about 10 p.m. He believed the accident had been caused by a tire blowout.

William Andershak of Coleman, said he had seen the accused outside his home about 6 p.m. and he had been "all right" then. But he stated Cichy left home about 8 p.m.

Magistrate Radford felt there was not sufficient evidence to find the accused guilty of the charge of driving while intoxicated and found him guilty of driving while impaired.

AMBASSADOR'S REPORT, by Chester Bowles (Harper, 1954, \$4.00). — Personal account of author's reactions to India and Southeast Asia while serving as American ambassador to India from 1951 to 1953.

SEVEN YEARS IN TIBET, by Heinrich Harrer (Dutton, 1954, \$5.00). — A rounded account of Tibetan life by an Austrian mountaineer who became a tutor to the Dalai Lama.

Advertising...

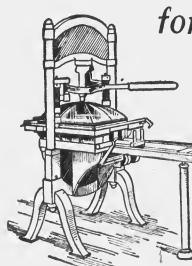

Modern advertising is a necessity to hold and build business. Be proud of your business, of the goods you have to sell, of the services you have to offer in your particular line. Show the progressive spirit and the desire to serve by advertising. Do not hide your light under a bushel — proclaim far and wide who you are and what you have to sell and where your place of business is, for public memory is short, and advertising is a powerful aid to all types of businesses. Moreover, people as a general rule shop where they are invited.

Health News Service

TORONTO, Ont. — "Only by knowing artificial respiration thoroughly can you be sure that you are doing everything to save a life," states Mr. W. J. Bennett, Chief Commissioner of the St. John Ambulance, writing in a article, specially prepared for the current issue of **HEALTH** magazine, official publication of the Health League of Canada.

"St. John points out that each year approximately 1,000 Canadians lose their lives through drowning and that another 2,000 are asphyxiated through electric shock, carbon monoxide and other ways. If more people knew artificial respiration, a great many of these lives could be saved."

He mentioned the St. John — Save a Life week—which was held during the early summer, saying that persons wishing to learn artificial respiration only needed to take one of the two-hour classes which were mostly demonstration and practice. They recognize three methods — the Holger-Nielsen, Schaefer's and Silvester's.

In the Holger-Nielsen method, which is described in detail in the rest of the article, the rescuer kneels at the head of the victim, facing him, and exerts pressure and release. The hands should rest on the victim's back, the palms resting on the shoulder-blades, the thumbs on the back-bone, and the fingers pointing towards the victim's feet.

Mr. Bennett points out that this method must be learned at a first aid class. He stresses the fact that artificial respiration should be kept up until unmistakable signs of death (rigor mortis) appear.

Coffee Defended

A healthy person can drink up to 30 cups of coffee a day without harming himself, according to expert's opinion in the journal of the American Medical Association reported to the Health League of Canada from the Medical and Pharmaceutical Information Bureau.

Another expert added that this much coffee might produce nervousness, trembling, insomnia, erratic heart beats and headache. "However," he adds, "in healthy persons these effects ordinarily are not serious, and disappear promptly if the amount of coffee is reduced." The physician warns, however, that where organic ailments such as heart, intestinal, stomach or nervous disease exist, the excessive use of coffee should be avoided. But even persons with these conditions may be allowed a small amount of coffee every day without harmful effects.

**Tourist Trade Hurt
By Fernie City By-law**

FERNIE, B.C. — Fernie city council, at its regular meeting on Monday, decided to call for tenders for insurance covering city properties. The action was taken because the present insurance underwriters are discontinuing business at the end of September.

John Patterson, who operates a confectionery, grocery and second hand business, wished to know if he could sell groceries after 6 p.m. According to by-law he is not permitted to do so.

Mr. Patterson informed the council he is permitted to sell candy, ice cream, pop, fruit and tobaccos after 6 p.m., but he is un-

able to sell the tourist the loaf of bread, the pound of butter, the bottle of milk or the can of beans he may desire.

It seemed strange to him that every effort is made to attract tourists to the city, but the tourist must be directed to the nearest highway store out of the city to purchase his grocery wants or go to the nearest restaurant to purchase the loaf of bread or bottle of milk. The city clerk was instructed to write Mr. Patterson that should he be able to get the required percentage of requests from the other licenced grocers in the city, the council would consider an amendment to the by-law to permit sale of groceries after 6 p.m.

Gems of thought

POVERTY AND RICHES
Wealth is not his that has it, but this that enjoys it. — Benjamin Franklin.

Giving does not impoverish us in the service of our Maker; neither does withholding enrich us. — Mary Baker Eddy.

He is poor whose expenses exceed his income. — Jean de la Bruyere.

He who is not liberal with what he has, does but deceive himself when he thinks he would be liberal if he had more. — W. S. Plumer.

Poverty is no disgrace to a man but it is confoundingly inconvenient. — Sidney Smith.

Some are unmercifully liberal, and more delighted to give presents than to pay debts. — Sir Philip Sidney.

Trials of an Editor

Getting out any magazine is no picnic.

If we print jokes, people say we are silly.

If we don't, they say we are too serious.

If we stuck close to the office all day.

We ought to be around hunting material.

If we go out and try to hustle, We ought to be on the job in the office.

If we don't print contributions, We don't appreciate genius; If we do print them, the paper is filled with junk!

If we edit the other fellow's write-up we're too critical;

If we don't, we're asleep.

If we clip things from other papers,

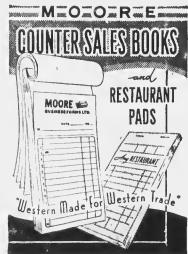

We are too lazy to write them ourselves;

If we don't, we are stuck on our own stuff.

Now, like as not, some wise guy will say

We swiped this from some other magazine.

We did.

The Coleman Journal

Everett J. Irwin, re-elected president of the British Columbia Automobile Association, and J. Frank Bird, secretary-manager, received congratulations from the Board of Directors for the outstanding growth of the Association in 1954. Membership is now over 56,000 with more than half the members outside the greater Vancouver area. "The BCAA is truly a province-wide association," said Mr. Irwin.

World Happenings In Pictures

DAVY CROCKETT RUNS WILD—Bill Staples, six, better known to his cronies as Davy Crockett, glues his nose against the window of a New York City department store the better to ogle coonskin hats, six-guns, stage coaches and—shades of the Alamo—brief cases. Anything that remotely smacks of the frontier—and much that doesn't—is riding the tail of Davy Crockett's legendary coonskin cap during his reign over the imagination of the nation's small fry.

TOM'S NOT FORGOTTEN—That certain frontiersman to the contrary and assorted space characters notwithstanding, Tom Sawyer and Huck Finn still float down dreamy rivers as small boys relive their legendary adventures. Ready to shove off for a good, old-fashioned session of rafting on Peachtree Creek, Atlanta, Ga., are, from left: Luke Curtis, 8; Jimmy Geisler, 6, and brother Bill, 10. The boys' pet pooch is serving as pilot.

THIS ARTIST'S SKETCH shows the latest trend in aviation design. A jet plane, equipped with an atomic bomb, takes off from an atomic-powered submarine close to enemy shore. The jet would be picked up at sea following the attack.

IT'S ALL IN HOW YOU LOOK AT IT—Woman at left is puzzling over modernistic bronze of an equestrienne which is being made ready for mounting in Boston, Mass., Public Gardens as an exhibit for the fourth annual Boston Arts Festival. At right, man with sweater over his head isn't THAT startled by the unusual treatment. He's just using the garment as a makeshift darkroom in which to reload his camera.

3150

STAGGERING—That's what Detroit Tigers' Jack Phillips is doing. All right, he's in Toledo, too. Tch-tch. But it's strictly in line of duty. He's getting out of the way as a close pitch sizzles by, during a Tigers-Yanks game.

HE CHUCKS WOOD—In favor of ice cream, pet of Mrs. W. H. Fleming, Bay Village, Ohio, "Woody" will gnaw up any given quantity of the cold stuff. Perhaps he wants to become acclimated to the chilly weather he'll meet next spring as tradition's best-known weather prophet.

FINNY FASHION—Symphony in styling for underwater fishermen is exhibited by Met's top basso, Jerome Hayes, who "models" a striped sheepskin which goes well with his patterned sweater, as he comes from the water at Nag's Head, N.C.

THE WHOLE TRUTH
The labels on food and drugs sold in Canada must bear a true description of the contents as well as the name and address of the manufacturer. This is done to protect the purchaser from adulterated, impure or unclean food or drugs. If any purchase of food or drugs is found to be untruthfully labelled or the contents impaired, the local food and drug inspector should be notified so that the offending article may be withdrawn from sale and action taken to prevent any recurrence of the offence.

JAIL-BOUND JELKE—Minot F. "Mickey" Jelke, foreground, heads for a prison van in New York with a fellow prisoner. The oleomargarine heir will serve a two-to-three year term. He was convicted of compulsory prostitution.

NEW STATUE OF CHURCHILL—This bronze statue by sculptor Oscar Nemon of Sir Winston Churchill, was unveiled during ceremonies at London's ancient Guildhall.

IN COOL CUSTODY—Guard Richard Thomas gives himself up to "Old Man Snow," who keeps cool despite the 90-plus degrees sometimes recorded in Los Angeles, Calif. Snowman, sponsored by the Los Angeles Water Resources Authority, is kept under constant refrigeration. He reminds Angelinos who visit the Museum of Science and Industry of the importance of winter weather in the mountains to their water supply.

OUR COMPLETE SHORT STORY

A slow poke speeds up

—By CHARLES CLARKSON

LARRY TIMS stood near the door of the restaurant and stared at the lively little blonde behind the cashier's desk. She repeated her words.

"Yes, I'm leaving, Larry. The Domino chain has offered me a job as relieving cashier. I'll be traveling all around."

His mouth drooped, but he managed a smile. "That sounds like a grand job, Ann. I'm sure pleased."

"Oh . . . well, thanks, Larry." Ann Gales turned quickly to hide the tears in her eyes.

Larry started toward the show window, changed his mind and sat down at the soda fountain. Half to himself, he said slowly, "She's leaving."

Ginger, the red-headed soda jerker, glanced over. "Who? Ann? Sure, today's her last day. She just told you?" Larry nodded glumly.

Ginger was scornful. "Listen, pal. You fell for her the first time you came here to trim the windows. Not that I blame you. Ann's a peach of a kid—and a swell looker, too. But what do you do?"

"Once a week I blow in the say here, Ann. You know the time I'm just looking at her so that you're sticking pins into your fingers instead of into that colored paper you carry around. Why don't you give yourself a break?"

It's true, Larry thought sadly. All week he'd look forward to Friday, his day to do the restaurant windows. He'd plan what he was going to say—suggest calling for her after work; perhaps a drive out the parkway and a bite to eat. After that . . . well, he was sure things would work out all right.

But when Friday came, it was always the same. One look at the warm, smiling eyes and his courage vanished.

He tried to explain to Ginger. "You don't understand, kid. I'm not in Ann's class. She wouldn't be with me. Besides, I don't know how to begin."

Ginger made a sour face. "Listen, chum. Just give yourself a big build-up—tell her what a great guy you are. Next thing, she's eating out of your hand."

"Not me," Larry groaned. "She's probably looking in the face."

He went back to the work, gathering the crepe paper into fancy patterns, and pinning up the little felt letters. He glanced often toward the cashier, but the dark head never turned in his direction. He was ignored. He felt crushed, beaten.

PREMIER: JAMES DOUGLAS
S. M. ARNASON
Deputy Minister

By noon he was desperate. Sliding into a fountain seat, he beckoned the red head toward him. "Listen, Ginger. You've got to help me. Today's my last chance. Couldn't you talk to Ann? Tell her . . . you know, that I'd like to see her again and all that?"

Ginger shook his head decided.

"That's no good. You've got to tell her yourself. Go on—what's stopping you?"

Ginger puckered his forehead in thought. Finally his face brightened.

"Why don't you? Give her a going-away present? She's sure to be pleased. After that it's strictly up to you."

Ginger seemed doubtful, but a determined look grew in his eyes. "I'll do it! She can't do worse than say 'no'."

As he went by the cashier's desk, he said, "I'll be back later." Ann didn't seem to hear.

That afternoon he decided on a plan. He bought a large box of chocolates, in the shape of a heart. It was a red box, tied with a silver ribbon. He drove to a quiet street, took out his material kit, and set to work.

First, he fastened the chocolate box against the car window. Then his quick fingers fashioned tiny roses out of crepe paper, and arranged them around the box. Finally, selecting felt letters from the glass, spelling his message. "Good-bye, Ann."

He was pleased as he drove back to the restaurant and stopped opposite the door. It was nearly five o'clock. Ann couldn't miss his message!

He settled down to wait. It seemed a long time, and he kept glancing at his watch. Fifteen minutes past five. Twenty. Twenty-five.

He kept looking at his hands, too. At first the look was admiring. He was exhausted, happy, but he was still in his mood. Laughs and glances from passers-by didn't help any. Slumped lower in his seat.

"I'm crazy," he thought dizzily. "I'll think I'm ridiculous . . . I can't get through with it," he decided desperately. "I'll go in, say goodbye sensibly, and drive away before she can see this and laugh at it."

He ran across the sidewalk and through the door. Ann was nowhere in sight.

Ginger gave him a pitying look. "You're late, chum. She left early."

"She . . . left . . . early?" he repeated dazedly.

"Yeah. She seemed upset about something. Kept fussing around that window you worked on this morning. Finally she asked the boss if she could go home."

Larry's short laugh suggested he turned out the show window. There couldn't be anything wrong with his display.

At first everything seemed in order. But there was something—the letters had been changed! He spelled out the words. "So long, Larry," it said.

"Why?" he thought wildly, "she likes me! She must . . . or she wouldn't have bothered. If only I'd seen her . . ."

He looked sadly out at the car. There was someone standing there, hands pressed against the side, smiling at his design. The little figure with jet black curly hair—Ann! He tore through the store and out into the street.

She turned slowly, giving him the loveliest smile he had ever seen.

"Larry! How wonderful! You did that for me—I hardly thought you knew I existed!"

"You thought . . . I didn't know . . . he repeated numbly. "You mean . . ."

She made a self-effacing little bow. "Oh, I know there's no reason why you should. But I hoped that some day you'd get around to saying something more than 'good morning' to me. And today you told me you were glad I was leaving! When you didn't come back this afternoon to say goodbye, was I not upset I went home. But I had to come back, in case you did show up. You must think I'm awfully silly."

His chest seemed to swell, and there was new dignity and poise in his voice. "Not silly, Ann. I think you're grand." Confidently, he leaned over and murmured, "Ann, would you like to come for a drive out the parkway, perhaps—and then go somewhere for dinner?"

Ann looked up with shining eyes. "How could I say no?" she whispered. "You're so masterful!"

Junior Art
Exhibition
opens Nov. 9

REGINA. — The Saskatchewan Arts Board is again sponsoring a Junior Art Exhibition opening on Wednesday, November 9, at the Saskatchewan Teachers' College, Regina. According to Miss Norah McCullough, Saskatchewan Arts Board secretary, this will be the fourth exhibition of its kind to be held in the province.

Teachers of schools, principals, and all those interested in the encouragement of art education to especially take note of this fall exhibition.

Teachers are asked to retain student work for submission to this Junior Art Exhibition since it had not been possible to have printed notices circulated before the end of the school term, Miss McCullough said. Printed notices and entry forms giving full particulars will be sent out late this September. Entries should be large in size and the student's own original work. No copies will be accepted.

The exhibition will be open to anyone, whether a student or not, from 13 to 21 years of age, comprising all school pupils.

Substantial prizes are being offered for the young people sending their art efforts to the Junior Art Exhibition, Miss McCullough added. Generous awards have been contributed by a private donor and art supply dealers, and six cash purchase prizes are offered by the Saskatchewan Arts Board, amounting to approximately \$200 in all.

Enquiries regarding the Junior Art Exhibition for 1955 should be directed to the Saskatchewan Arts Board, 110 Broad Street, Regina.

Fashions

Button-on magic!

4809 10-20
by Anne Adams

CHANCE from sunburn to city dress quick as a wink with that clever collarlet! See how it buttons right to the dress—points up the curve shape of the neckline. You get a much more wear out—a smart combination like this—and it's so easy to make!

Pattern 4809: Misses' Sizes 14, 16, 18, 20. Size 16 dress 41", yards 3½. Pattern 4810: dress 41", yards 3½. Pattern 4811: pattern to sew, to fit. Has complete illustrated instructions.

Send thirty-five cents (35¢) in coins (stamps cannot be accepted) for this pattern. Write plainly size, name, address and style number and send orders to:

Plain facts from young writers
give frank reports on history

REGINA. — The children of Summerberry have put it down for all to see: The town has a "notable group of ladies," the television reception is just so-so, a lot of the local cows have Bang's disease, and in 1946 Pete Hewitt's garage burned down, writes Don Hamright for Canadian Press.

The 20-odd school students at Summerberry, a typical Saskatchewan farm town 75 miles east of Regina, included these in a scrapbook-style history of their community.

Written by a dozen different hands in cautious, easily-legible longhand, the Summerberry history is typical of hundreds which have or will be done this year as the school population's special contribution to the province's golden jubilee celebrations.

Wide participation

More than 4,000 schools in the province were expected to participate in the program. Although most students will write in longhand, several already have come off commercial presses and others have been typed and mimeographed.

From the thousands of pages of copy produced, school superintendents will cut those most valuable to the general history of the province and these will be put on microfilm by the provincial archivist, Dr. F. E. Thomas, and his staff.

Most of the histories open in the same way—"Our town is situated in the heart of the greatest wheat belt in Canada" and "It is here that the first settlers will be buried." The histories then plunge into a chronological heap of facts and figures on churches, auto dealers, pool halls, and a cow decapitated by the morning train back in 1913.

The elevator girl had a word for everybody.

"It'll be you see some strange sights," she said to the window washer.

"Yes, indeed," replied the man with the bucket, belt and sponges. "Why, there's an office on the fourth floor where everybody's always working."

She waited at the corner, joyously—then pensively—then expectantly—then casually—then anxiously—and an hour passed.

"Man," he said, "I'm a brute, faithless and untrue, incapable of keeping a promise."

Two hundred yards down the street he said the same things about women. She was at the wrong corner.

Teacher (to tardy boy): "Why are you so late?"

Boy: "Well, I always obey the laws."

Teacher: "Well just what do you mean?"

Boy: "There's a sign down the road that says, 'School ahead, go slow.'"

Little Betty was crying bitterly. Her mother asked her what was the matter.

"My new shoes hurt me."

"No wonder. You have them on the wrong feet," replied mother.

Betty kept on bawling.

"I haven't any other feet."

she said.

PICNIC SAFETY

Meals are a joy of course, but a picnic taste twice as good as those eaten indoors but the picnic which includes a campfire can end in costly and dangerous blazes unless care is taken to ensure that the fire is completely extinguished and that matches or cigarette butts are not left burning. Forest fires start quickly and often at the cost of wild life and human injury. Fires should never be lighted where there is dried grass or vegetable matter. The site for the fire should be as small as possible, should be on rock, sand or mineral earth so that the embers cannot cause a wide spreading fire underground.

Pattern 4809: Misses' Sizes 12, 14, 16, 18, 20. Size 16 dress 41", yards 3½. Pattern 4810: dress 41", yards 3½. Pattern 4811: pattern to sew, to fit. Has complete illustrated instructions.
